

19 May 2015 SSRI was visited by year 10 and 11 students from Cherrybrook Technology High School as part of [2realise's industry bites](#) program. Combining a tour of our facilities with demonstrations of our technologies, the students had opportunity to quiz our staff about the various aspects of working in biotechnology that interested them.

A rewarding day for students and staff alike, we trust that the students gained a satisfying glimpse into the fascinating world that is our industry. Read more about the students' visit [here](#).
